

3 Flute Non Ferrous Carbide Milling Tool.
UK Manufactured, Locally stocked.
Uncoated and DLC Options available

HYP-ACE-(DLC)

Our HYP-ACE endface is designed using the latest technology to provide optimum swarf evacuation reducing the chance of chip welding and increase operation speeds.

The HYP-ACE's 45 degree High Helix flute design reduces force going into the job by directing cutting pressure into the spindle.

- Increase rigidity, reduce vibration
- Increase cutting speeds

With a wide range of square and corner radiused edges available from UK stock, the HYP-ACE cutter offers the best option for high metal removal in aluminium and other non-ferrous materials.
